

Applicant: David Aubrey Jackson  
Title: Gambling Game  
Application No.: 60/270,898  
Filing Date: 02/26/2001

**What is claimed is:**

1. A method and apparatus for playing a game of chance and odds, comprising of:
  - a. providing a playing path, said path having a first and second end and being divided into a plurality of spaces for indicating the movement of player's game pieces;
  - b. having a six-sided die, wherein each of the sides has a different indicia thereon indicating a number 1 through 6;
  - c. game pieces representing each player;
  - d. a score path which upon score markers move along to identify points awarded to players;
  - e. score markers representing each player score;
  - f. a point value for each way of scoring. One point is given to a player if opponent forfeits. Two points are given to a player if opponent lands on or goes beyond the player's piece. Three points are given to a player that lands in the anterior adjacent space of opponent's game piece; and
  - g. repeating the following steps until a winner is determined:
    - I. positioning game pieces and score markers in appropriate starting places;
    - II. choosing a player to begin by any means;
    - III. having a player roll the die;
    - IV. allowing player to move its game piece toward opponent the number of spaces along the path of play, the number of spaces moved being equal to the number rolled on the die;
    - V. having opponent roll the die;
